

# 2022 Subscriber Solar ANNUAL REPORT

SUBSCRIBER  
**SOLAR**

 **ROCKY MOUNTAIN  
POWER.**  
POWERING YOUR GREATNESS

## 2022 at-a-glance

As a vital member of the Subscriber Solar community, you're helping to make a significant and positive impact here in your community. The numbers tell an impressive story.

Last year:

**2,300 residential customer meters subscribed**

17,477,305 kWh supported

**828 business/community meters subscribed**

31,539,090 kWh supported

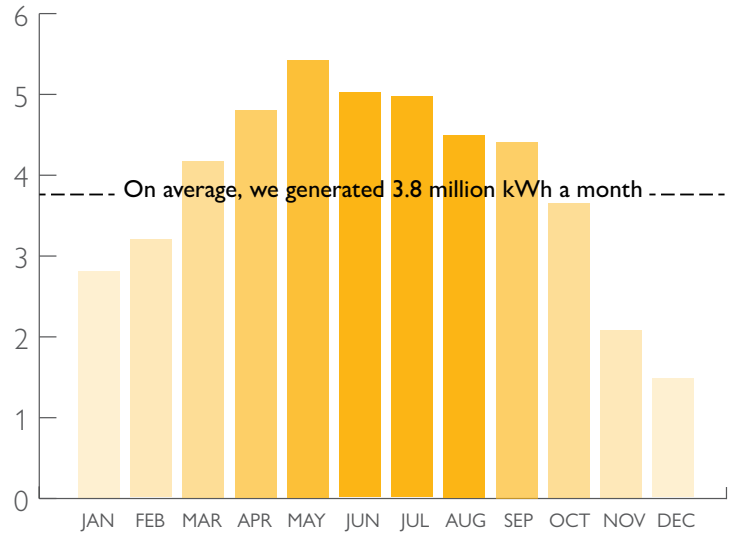

**81,840 solar panels** near Holden, UT

**46,040,088 kWh of solar energy generated**

**\$31,927 donated** to low-income programs

## 2022 Monthly Generation

At Our Holden, Utah, Subscriber Solar Plant

What's the impact of generating 46 million kilowatt-hours?

That's like taking  
**7,254**  
cars off the road

Charging  
**3.9 billion**  
smartphones

Planting  
**539,034**  
trees

## SUBSCRIBER SPOTLIGHT

### Lifetime Products

Lifetime Products aims to fulfill their sustainability goals and achieve 100% renewable energy. By implementing programs like Subscriber Solar, they're making strides to achieve this. Even though their production and energy usage are up by 89% at their Salt Lake facility, they're producing 41% less greenhouse gas emissions through this partnership.

"We're striving to bring about an overall environmental impact with help from programs like Subscriber Solar. As we work toward fulfilling our sustainability goals, our focus areas are six of the 17 Sustainable Development Goals that the United Nations has designed to serve as a blueprint to achieve a better and more sustainable future for all. Clean water and sanitation, climate action, affordable and clean energy, decent work and economic growth, industry innovation and infrastructure, and responsible consumption and production are the areas we are focusing on. Each of the Sustainable Development Goals is part of the projects and goals we're working on this year.

"Our mission is to create opportunities for our customers and others. We realize responsible consumption of resources is essential for all companies and critical for building long-term opportunities for everyone." (Landon Southwick - Digital Media Manager)

# More Options to Help You Reach Your Goals

We're inspired by your commitment to the environment and our community. That's why we have options to help you achieve your energy goals and reduce your environmental impact.

**BLUESKY**  
RENEWABLE ENERGY

Blue Sky empowers customers to reduce their environmental impact and support clean energy in the West. You can support clean energy for as low as \$1.95 per month and choose the participation level that's right for you. In addition to purchasing renewable energy certificates, Blue Sky customers also fund renewable energy projects.

This year our Blue Sky customers contributed to installing a 492-panel solar array on the parking canopies at a new facility on the University of Utah Moab campus. With this installation, almost 100% of the building's energy now comes from the sun. This new site is a combustion-free, net-zero energy structure, designed to harness solar energy using energy-efficient materials in the walls and floor.

See a full listing of the projects at [RockyMountainPower.net/BlueSkyFunds](https://RockyMountainPower.net/BlueSkyFunds)

## Full Coverage Solar Option

Residential and Small Business customers have a choice to either subscribe in blocks of 200 kilowatt-hours each, or to cover 100% of their energy usage. This latter option is very popular if you want to fully green your power. We have 600 residential customers and 295 small business customers greening all of their usage, supporting over 8 million kilowatt-hours of solar power. With the Full Coverage option, all of your electrical usage is billed on the Subscriber Solar rate and you avoid having any excess credits donated each year. You can request this change by calling **844-813-3971** and speaking to one of our Subscriber Solar specialists.

## Dual Fuel Heat Pumps

Dual fuel heat pumps are more efficient and affordable, and provide better comfort to you and your household.

The heat pump works like a high-efficiency central air conditioner in the summer. It provides efficient heating in the spring, fall and winter, while the gas furnace takes over only when needed during the coldest months of the year. Rocky Mountain Power customers can save up to 50% on their heating and cooling costs by using one of these innovative heat pumps.

## Cool Keeper

When you join the Cool Keeper program, you can help use energy wisely. This small act can have a big impact on preserving our national resources. At Rocky Mountain Power, we're advancing renewable energy and reducing emissions, and you can do your part as well.

Cool Keeper maximizes energy resources during the summer. Join 100,000 Utahns who are making a difference and shaping our energy future. You'll help keep Rocky Mountain Power's prices among the nation's lowest and receive \$30 in credit on your bill every year. Enroll today at [RockyMountainPower.net/CoolKeeper](https://RockyMountainPower.net/CoolKeeper)

# SUPPORT GREEN-POWERED BUSINESSES

These are just a few businesses that support Subscriber Solar:

Canyons School District  
(Sandy)

Supports 3.4 million kWh annually

Silver Star Ski & Sport  
(Park City)

Supports 4,800 kWh annually

Deer Valley Resort  
(Park City)

Supports 1.8 million kWh annually

Pinyon Tree Gift Shop  
(Moab)

Supports 19,000 kWh annually

## Power For a Bright Future

To serve you with the most reliable and sustainable energy possible, we're making progress on our plans to strengthen the grid and expand renewable energy capacity.

We're making these smart investments in the energy system of the future – all while keeping costs low.

We're already the largest regulated utility owner of wind power in the West, and that's just the start. By 2032, we'll have added over 20,000 megawatts of renewable resources, a commitment to a clean energy future.

Expanded renewable energy generation is just one part of our plan to serve vital homes, businesses and communities.
