Participant may be responsible for the tax reporting to the IRS of any incentive payments directed to third parties. Neither Rocky Mountain Power nor its Program Administrator is providing tax advice, and any communications to such parties is not intended to be used, and cannot be used, for the purpose of avoiding penalties under the Internal Revenue Code.

Incentive Limitations & Limitation of Damages: Rocky Mountain Power does not warrant the performance of qualifying/installed equipment and does not warrant that the qualifying/installed equipment will deliver any specified amount of energy or cost savings. Customer shall independently evaluate the qualifying equipment. In no event will Rocky Mountain Power be liable for the failure of the Customer to achieve its expected amount of energy savings, for harm to Customer's facilities of any kind, or for any incidental or consequential damages of any kind in connection with installation of this qualifying equipment.

Transfer of Environmental Attributes: Customer hereby transfers to Rocky Mountain Power all "Environmental Attributes" attributable to the installation of the qualifying equipment or its operation. Environmental Attributes include any and all credits, benefits, emissions reductions, offsets and allowances, howsoever entitled, resulting from the avoidance of the emission of any substance to the air, soil or water at or by PacifiCorp generating facilities, through reduced generation of energy or other savings or offsets on account of the qualifying equipment. Customer will not claim ownership of any Environmental Attributes. As long as Customer at the same time states the installation of the qualifying equipment was made possible with funding from Rocky Mountain Power, Customer may claim that it is facilitating the production of the Environmental Attributes attributable to the qualifying equipment.

Additional Details: Incentive qualifications and amounts are subject to change and termination at any time. Visit the program's website, review the Incentive Catalogs or contact your local equipment dealer or Rocky Mountain Power for current program information. Rocky Mountain Power reserves the right to conduct random inspections to verify information provided on the application. After incentive payment, Rocky Mountain Power reserves the right to inspect qualifying equipment, which may include a telephone survey, site visit, and/or the installation of temporary monitoring equipment at any time up to 36 months after installation for quality control of the application or program performance evaluations.

Rocky Mountain Power issues FinAnswer Express incentives in the form of checks, not utility bill credits. Rocky Mountain Power is not responsible if your dealer provides inaccurate information about the amount and/or conditions of the actual incentive and Rocky Mountain Power will not pay incentives for equipment that is mislabeled or misrepresented by dealers regarding incentive qualifications. Qualifying equipment receiving incentives under the FinAnswer Express program may not receive purchase and installation incentives or credits under other Rocky Mountain Power programs.
