

Office Equipment & Appliances

Rocky Mountain Power provides incentives for many types of energy efficient technologies. Please read the following sections carefully to ensure that you follow the appropriate steps for securing your incentive.

Incentives for additional measures may be available. For more information about the FinAnswer Express program, eligibility requirements, incentive levels or other general inquiries, contact your local equipment dealer or Rocky Mountain Power. You can visit the program website at rockymountainpower.net/wattsmart and submit your inquiry online, or you can call our **energy services hotline** at 1-800-222-4335.

HIGH-EFFICIENCY CLOTHES WASHER (COMMERCIAL)

Measure Description: A commercial clothes washer is used in a Laundromat or other commercial laundry facility and often is a coin-operated machine. Clothes washers that have earned the ENERGY STAR rating are more efficient than models that simply meet the federal minimum standard for energy efficiency.

Applicability: New construction and retrofit installations are eligible for an incentive via a post-purchase application process.

Equipment Eligibility: Equipment must be purchased and installed on or after October 1, 2011, and meet all other programs terms and conditions. Equipment must be purchased and installed in a business with electric water heating, and meet all other program terms and conditions. Incentives are available for equipment that is ENERGY STAR® or Consortium for Energy Efficiency (CEE) Tier 3 qualified.

For a list of qualified equipment visit: www.energystar.gov and www.cee1.org

A list of qualifying products is available on the ENERGY STAR® website at:

http://www.energystar.gov/index.cfm?fuseaction=clotheswash.display_commercial_cw

A list of qualifying products is available on the CEE website at:

<http://www.cee1.org/com/cwsh/cwshspec.pdf>

Items to submit with a FinAnswer Express incentive application:

1. Dated sales receipt/invoice with retailer/contractor name, address and phone number.
1. Itemized listing of quantity, description, manufacturer, model number and other identifying information as appropriate.
2. Serial number of washer.
3. A current copy of the Rocky Mountain Power utility bill for the address where the item(s) are installed.

Prequalification Required? No.

<u>Equipment code</u>	<u>Minimum Efficiency Requirement</u>	<u>Incentive</u>
CWCMT1	ENERGY STAR® qualified	\$ 150/ unit
CWCMT2	CEE Tier 3 qualified	\$ 200 / unit

HIGH-EFFICIENCY CLOTHES WASHERS (RESIDENTIAL USED IN BUSINESS)

Measure Description: A residential clothes washer is a consumer product designed to clean clothes in a single family residence. Clothes washers that have earned the ENERGY STAR rating are more efficient than models that simply meet the federal minimum standard for energy efficiency.

Applicability: New construction and retrofit installations are eligible for an incentive via a post-purchase application process.

Equipment Eligibility: Equipment must be purchased and installed on or after October 1, 2011, and meet all other program terms and conditions. Equipment must be purchased and installed in a business with electric water heating and meet all other program terms and conditions. Incentives are available for equipment that meets or exceeds the Rocky Mountain Power’s Home Energy Savings program efficiency requirements. Clothes washers must have a Modified Energy Factor (MEF) of at least 1.72 to be eligible.

A list of qualifying products is available on the Home Energy Savings website at:
<http://www.homeenergysavings.net>

Items to submit with a FinAnswer Express incentive application:

4. Dated sales receipt/invoice with retailer/contractor name, address and phone number.
5. Itemized listing of quantity, description, manufacturer, model number and other identifying information as appropriate.
6. Serial number of washer.
7. A current copy of the Rocky Mountain Power utility bill for the address where the item(s) are installed.

Prequalification Required? No.

<u>Equipment code</u>	<u>Minimum Efficiency Requirement</u>	<u>Incentive</u>
CWRET1	MEF 1.72 – 1.99	\$ 50 / unit
CWRET2	MEF ≥ 2.0	\$ 75 / unit

ELECTRIC WATER HEATER (RESIDENTIAL USED IN BUSINESS)

Measure Description: An electric water heater uses electricity to heat potable water for use outside the heater. Energy-efficient storage water heaters have higher levels of insulation around the tank, substantially reducing standby heat loss.

Applicability: New construction and retrofit installations are eligible for incentive via a post-purchase application process.

Equipment Eligibility: Equipment must be purchased and installed on or after October 1, 2011, and meet all other program terms and conditions. Equipment must be purchased and installed at a business, and meet all other program terms and conditions. Incentives are available for equipment that meets or exceeds the Rocky Mountain Power's Home Energy Savings program efficiency requirements. The capacity of the residential electric water heater must be 40 gallons or larger and have an Energy Factor (EF) of 0.93 or higher.

A list of qualifying products is available on the Home Energy Savings website at:
<http://www.homeenergysavings.net>

Items to submit with a FinAnswer Express incentive application:

8. Dated sales receipt/invoice with retailer/contractor name, address and phone number.
9. Itemized listing of quantity, description, manufacturer, model number and other identifying information as appropriate.
10. Serial number of water heater.
11. A current copy of the Rocky Mountain Power utility bill for the address where the item(s) are installed.

Prequalification Required? No.

<u>Equipment code</u>	<u>Minimum Efficiency Requirement</u>	<u>Incentive</u>
WHERES	EF ≥ 0.93	\$ 50/ unit

SMART PLUG STRIP

Measure Description: Smart Plug Strips reduce energy consumption by controlling low wattage devices using an occupancy sensor, electric load sensor, or a timer. Common applications are computer monitors, desk lamps, printers, and other desktop equipment.

Applicability: New construction and retrofit installations that meet or exceed the efficiency requirements listed for the equipment eligibility may qualify for an incentive via a post-purchase application process.

Equipment Eligibility: Incentive applies to any plug strip that eliminates idle or stand-by power consumption of connected plug-load appliance through the use of an occupancy sensor, electric load sensor, or a timer.

Items to submit with application:

1. Dated sales receipt/invoice with install date and retailer/contractor name, address and phone number
2. Itemized listing of quantity, description, manufacturer, model number and other identifying information as appropriate
3. Manufacturer's equipment specification sheet
4. A current copy of the Rocky Mountain Power utility bill for the address where the item(s) are installed.

Prequalification Required? No

<u>Equipment Code</u>	<u>Measure Description</u>	<u>Incentive</u>
PLGSEN	Smart Plug Strips	\$ 15/ unit

NETWORK PC POWER MANAGEMENT SOFTWARE

Measure Description: Network power management software reduces energy use by remotely placing computers and monitors in a low power sleep mode after a predefined period of inactivity. While most computers already include this individual functionality, it is typically not enabled or used by individual users. When computers are connected to a network, the network power management software automatically controls the power settings of networked personal computers at the server level.

Applicability: New construction and retrofit installations that meet or exceed the efficiency requirements listed for the equipment eligibility may qualify for an incentive via a post-purchase application process.

Equipment Eligibility: Network PC Power Management Software must be purchased and installed on or after October 1, 2011, and meet all other program terms and conditions. Qualifying installations are eligible for incentives if they perform the following functions:

1. Installed software must automatically control the power settings of networked personal computers (PC) at the server level.
2. The software must manage power consumption for each individual PC.
3. The software must include the capability to report energy savings results.

Items to submit with application:

1. Dated sales receipt/invoice with install date and retailer/contractor name, address and phone number.
2. A copy of the Software License Agreement.
3. A report directly from the software that verifies the number of PCs that are being controlled by the software system.
4. The number of computers authorized per license.
5. A current copy of the Rocky Mountain Power utility bill for the address where the item(s) are installed.

Prequalification Required? No.

<u>Equipment Code</u>	<u>Measure Description</u>	<u>Incentive</u>
NPCPMS	Network PC Power Management Software	\$ 7 per controlled PC (up to 100% of measure costs)
