Renewable energy options

There is no minimum length of participation for these options; you may cancel at any time. However, minimum block purchases and a minimum purchase period of one year are required to participate in our business partner program (see Business Partner Program sheet).

Block: Support Western region wind (40%) and solar (60%) energy and help develop community-based, small-scale renewable energy projects for a fixed cost of \$1.95 per 100-kilowatt-hour block per month. Buy as many blocks as you would like. \$1.95 per block x _____ # of blocks purchased = \$ _____ per month

QS: Purchase at least 101 blocks of renewable energy per month in 100-kwh blocks for a minimum of one year. The more you buy, the less the per unit (block) cost. Please see rockymountainpower.net/blueskycalc for a calculator to determine exact costs. \$ _____ per block x _____ # of blocks purchased (must be at least 101) = \$ _____ per month

THANK YOU
for making a commitment to renewable energy through Blue Sky.
Your purchase helps make a difference.

When you enroll in Blue Sky, Rocky Mountain Power purchases renewable energy certificates equal to your Blue Sky purchase; this guarantees that renewable energy was produced and delivered to the grid, which helps reduce the need for nonrenewable electricity production in the region where the renewable energy facility is located. For every unit of renewable electricity generated, an equivalent amount of renewable energy certificates are produced. Your purchase helps build a market for renewable energy and may have other local and global environmental benefits. For more information about RECs, please visit rockymountainpower.net/bluesky or green-e.org.
