

Rocky Mountain Power  
Exhibit RMP\_\_\_(RMM-1SR)  
Docket No. 16-035-36  
Witness: Robert M. Meredith

BEFORE THE PUBLIC SERVICE COMMISSION  
OF THE STATE OF UTAH

ROCKY MOUNTAIN POWER

---

Exhibit Accompanying Surrebuttal Testimony of Robert M. Meredith

Summary of Positions Taken on Various EV TOU Pilot Issues

May 2017

Summary of Positions Taken on Various EV TOU Pilot Issues

Line No.	Issue	Company Proposal	DPU Position	OCS Position	WRA Position	UCE Position
1	Should the rates or one of the rate options for the EV TOU Pilot include inverted tier prices, such that energy is more expensive for higher	No. <sup>a</sup>	Yes. The DPU recommends that one option include tiered prices. <sup>e</sup>	The OCS could support having one option that includes tiered prices. <sup>i</sup>	No. <sup>m</sup>	Yes. UCE recommends that one option include tiered prices. <sup>q</sup>
2	What should be the difference in price for energy charges during the on-peak period as compared to the off peak period(s)?	3:1 differential for one option and 10:1 differential for another option. <sup>b</sup>	The DPU supports a 3:1 differential for both options. <sup>f</sup>	The OCS offers two alternatives. One with a 4:1 differential and another with a 2:1 differential. <sup>j</sup>	WRA supports the Company's 3:1 differential for one option along with another option which would use the off-peak energy charge from the Company's 10:1 price differential for a super off-peak energy charge. <sup>n</sup>	UCE supports a 2:1 differential for both options. <sup>r</sup>
3	What are the appropriate time periods for the EV TOU Pilot under which energy prices would vary?	The Company proposes the following On-Peak Hours: Oct - Apr - 8am - 10am, 3pm - 8pm, M-F, except holidays. May - Sept - 3pm - 8pm, M-F, except holidays. <sup>s</sup>	Same as the Company. <sup>g</sup>	The OCS offers two alternatives. One which would use the Company's periods and one with the following On-Peak hours: Oct - Apr - 8am - 9am, 5pm - 8pm, M-F, except holidays. May - Sept - 4pm - 7pm, M-F, except holidays. <sup>k</sup>	WRA thinks including a winter morning on-peak period should be reconsidered, because it could be confusing to customers. <sup>o</sup>	UCE recommends the following On-Peak Hours: Oct - Apr - 5pm - 8pm (maybe include 8am-9am too), M-F, except holidays. May - Sept - 5pm - 8pm, M-F, except holidays. <sup>v</sup>
4	Should there be a rate option that includes a super off-peak energy charge for charging during the middle of the night?	No. <sup>d</sup>	No. <sup>h</sup>	No. <sup>l</sup>	Yes. <sup>p</sup>	Not at this time. <sup>t</sup>
