VIA ELECTRONIC FILING AND OVERNIGHT DELIVERY

Utah Public Service Commission Heber M. Wells Building, 4th Floor 160 East 300 South Salt Lake City, UT 84114

Attention: Gary Widerburg

Commission Administrator

RE: Docket No. 20-035-01

Application to Increase the Deferred Rate through the Energy Balancing Account Mechanism

In accordance with Utah Public Service Commission ("Commission") Rule 746-1-203, PacifiCorp, d.b.a. Rocky Mountain Power, hereby submits for electronic filing its Application to increase the deferred EBA rate through the Energy Balancing Account mechanism. As requested by the Commission, Rocky Mountain Power is also providing seven (7) printed copies of the filing via overnight delivery. Workpapers supporting this application will also be provided electronically.

The enclosed proposed tariff sheets are associated with Tariff P.S.C.U No. 50 of Rocky Mountain Power, applicable to electric service in the State of Utah. Pursuant to the requirement of Rule R746-405-2D, PacifiCorp states that the proposed tariff sheets do not constitute a violation of state law or Commission rule.

Rocky Mountain Power respectfully requests that all formal correspondence and requests for additional information regarding this filing be addressed to the following:

Attorneys for Rocky Mountain Power

BEFORE THE PUBLIC SERVICE COMMISSION OF UTAH

IN THE MATTER OF THE APPLICATION OF)	
ROCKY MOUNTAIN POWER TO INCREASE)	
THE DEFERRED EBA RATE THROUGH THE)	Docket No. 20-035-01
ENERGY BALANCING ACCOUNT)	
MECHANISM)	

APPLICATION TO INCREASE THE DEFERRED EBA RATE THROUGH THE ENERGY BALANCING ACCOUNT MECHANISM

Rocky Mountain Power, a division of PacifiCorp ("Company" or "Rocky Mountain Power"), hereby submits this application ("Application") to the Public Service Commission of Utah ("Commission") pursuant to energy balancing account mechanism ("EBA") tariff Schedule 94 ("Tariff Schedule 94"), requesting approval to recover approximately \$36.8 million in deferred EBA Costs ("EBAC"). The \$36.8 million includes the following components: (1) a surcharge of approximately \$44.0 million, the difference between the Actual EBAC and the Base EBAC in current base rates for the period beginning January 1, 2019 through December 31, 2019 ("Deferral Period"); (2) a credit of approximately \$2.9 million for savings related to the Retiree Medical

Obligation; (3) a credit of approximately \$8.7 million related to an adjustment for sales made to a special contract customer; (4) approximately \$1.6 million in costs related to the Utah situs resources; and (5) a charge of approximately \$2.9 million in accrued interest.

The Company has included revised Tariff Schedule 94 to recover from customers \$36.8 million. This results in an overall increase to retail customers of the Tariff Schedule 94 rate of approximately 1.0 percent.

This Application is consistent with Tariff Schedule 94, approved by the Commission on July 17, 2012, as amended by the Commission's Order on EBA Interim Rate Process, issued August 30, 2012, and as amended in Dockets Nos. 16-035-T05 and 09-035-15 by orders issued May 16, 2016, February 16, 2017, and November 14, 2019 (together, the "EBA Order"). The Commission's most recent order, entered November 14, 2019, approved the EBA as an ongoing program, rather than a "pilot" program, and changed the carrying charge to be consistent with the Company's other account balances as of January 1, 2020.²

The proposed EBA rate increase reflected in this Application represents an EBA rate adjustment under Tariff Schedule 94 as set forth above. It is allocated to rate schedules pursuant to and consistent with the Commission-approved net power cost ("NPC") allocator from the Company's general rate case filing in Docket No. 13-035-184 (the "2014 GRC"), as explained

¹ In the Matter of Rocky Mountain Power for Approval of Its Energy Cost Adjustment Mechanism, Docket No. 09-035-15, Order (Nov. 14, 2019).

² *Id.* at 10, citing *In the Matter of a Request for Agency Action to Review the Carrying Charges Applied to Various Rocky Mountain Power Account Balances*, Docket No. 15-035-69, Order issued February 27, 2017.

further below. Rocky Mountain Power respectfully requests that, pursuant to the provisions in Tariff Schedule 94 and the EBA Order, the Commission authorize recovery of the amounts in this Application, with a change in Utah rates to become effective, per the schedule in Tariff Schedule

94, on March 1, 2021. In support of its Application, Rocky Mountain Power states as follows:

1. Rocky Mountain Power is a division of PacifiCorp, an Oregon corporation, which provides electric service to retail customers through its Rocky Mountain Power division in the states of Utah, Wyoming, and Idaho, and through its Pacific Power division in the states of Oregon,

- 2. Rocky Mountain Power is a public utility in the state of Utah and is subject to the Commission's jurisdiction with respect to its prices and terms of electric service to retail customers in Utah. Rocky Mountain Power's principal place of business in Utah is 1407 West North Temple, Suite 310, Salt Lake City, Utah, 84116.
 - 3. Communications regarding this filing should be addressed to:

Jana Saba Utah Regulatory Affairs Manager Rocky Mountain Power 1407 West North Temple, Suite 330 Salt Lake City, Utah 84116

California, and Washington.

E-mail: jana.saba@pacificorp.com

Emily Wegener Senior Attorney Rocky Mountain Power 1407 West North Temple, Suite 320 Salt Lake City, Utah 84116

E-mail: emily.wegener@pacificorp.com

In addition, Rocky Mountain Power requests that all data requests regarding this application be sent in Microsoft Word or plain text format to the following:

By email (preferred): <u>datarequest@pacificorp.com</u>

By regular mail: Data Request Response Center

PacifiCorp

825 NE Multnomah, Suite 2000

Portland, Oregon 97232

Informal questions may be directed to Jana Saba, Utah Regulatory Affairs Manager, at (801) 220-2823.

- 4. Tariff Schedule 94 permits the Company to monitor total EBAC on an unbundled basis apart from other investments and expenses included in base rates and to account for historical actual EBAC that may be over or under the amount recovered in base rates through the EBA.
- 5. Under Tariff Schedule 94, the Company files a deferred EBAC adjustment application annually on or before March 15. Included with this filing are changes to Tariff Schedule 94 to include provision for a rate effective date of March 1, 2021.
- 6. The EBA deferral calculation consists of two revenue requirement components: NPC and wheeling revenue. NPC are defined as the sum of fuel expenses, wholesale purchased power expenses, wheeling expenses, less wholesale sales revenue. Wheeling revenue includes amounts booked to FERC account 456.1, revenues from transmission of electricity of others. Collectively, the two components are known in Tariff Schedule 94 as "Energy Balancing Account Costs" or "EBAC".

- 7. The deferred EBAC is determined pursuant to Tariff Schedule 94 by comparing, in a deferral period, the actual NPC and wheeling revenue to the total base EBAC recovered in rates as established in a general rate case. From January 2019 through December 31, 2019, 100 percent was deferred for later recovery from or refund to customers. In addition, several adjustments were made to actual NPC this year, as described in the direct testimony of Mr. David G. Webb.
- 8. The Deferral Period for this Application is the 12-month period beginning January 1, 2019 through December 31, 2019.
- 9. The request in this Application includes five components: (1) the EBA deferral amount ("EBA Deferral Amount") for a charge of approximately \$44.0 million; (2) a credit of approximately \$2.9 million for savings related to the Retiree Medical Obligation; (3) a credit of approximately \$8.7 million related to an adjustment for sales made to a special contract customer; (4) approximately \$1.6 million in costs related to the Utah situs resources; and (5) a charge of approximately \$2.9 million in accrued interest.
- 10. For the Deferral Period, base NPC were set at \$1,491 million ("Base NPC") and wheeling revenue was set at \$97 million.
- 11. Actual NPC were higher than Base NPC during the Deferral Period as a result of, among other things, a reduction in wholesale sales revenue and increases in purchased power and natural gas expense, partially offset by a reduction in coal fuel and wheeling expenses, among other expenses.

12. The Company calculated the EBA Deferral Amount for the Deferral Period using the Commission Order Method consistent with the stipulation approved by the Commission in the 2014 GRC, as set forth in detail in **Exhibit RMP__(DGW-1)**, attached to Mr. Webb's direct testimony.

Deferred EBA Cost Adjustment

- 13. Pursuant to Tariff Schedule 94, the deferred EBAC adjustment is calculated monthly and recorded as a deferred expense on the Company's books. Mr. Webb's **Exhibit RMP__(DGW-1)** shows the detailed calculation of the EBA Deferral Amount. Adjusted Actual Total NPC from January 1, 2019 through December 31, 2019 were approximately \$1,648 million, compared to the \$1,491 million Base NPC being used in this case.
- 14. Utah's allocated NPC before wheeling revenues were approximately \$716 million. After crediting Utah-allocated wheeling revenues of approximately \$48 million, Utah actual EBAC were approximately \$667 million, shown on line 3, or \$27.05 per megawatt-hour ("MWh"), shown on line 5.
- 15. In comparison, Utah Base EBAC were approximately \$587 million, shown on line 8, after crediting Utah-allocated wheeling revenues of approximately \$41 million, shown on line 7, or \$25.25 per MWh, shown on line 10. The monthly difference between lines 5 and 10 applied to Utah's 2019 load produces the deferred EBAC of approximately \$44.0 million, shown on line 12.

- 16. The Retiree Medical Obligations savings related to the closure of the Deer Creek mine in the amount of approximately \$2.9 million are shown on line 13. An adjustment for sales to a special contract customer of approximately \$8.7 million, after applying a deadband, is shown on line 16. An adjustment related to the Utah situs resources, namely the Utah Subscriber Solar program and the Utah Transition Program for Customer Generators, of approximately \$1.6 million is shown on line 17. A charge for interest of approximately \$1.2 million for the Deferral Period (January 1, 2019 through December 31, 2019) is shown on line 22. A charge for expense for interest of approximately \$385 thousand (from January 2020 through March 2020) is shown on line 24. A charge for expense for interest of approximately \$1.3 million (from April 2020 through February 2021) is shown on line 25. The total ending deferral amount of approximately \$36.8 million is shown on line 26.
 - 17. A summary of the total requested EBA recovery is shown in the table below.

alendar Year 2019 EBA Deferral			Exhibit RMP(DGW Reference
Actual EBA (\$/MWh)	\$	27.05	Line 5
Base EBA (\$/MWh)	*	25.25	Line 10
\$/MWh Differential	\$	1.80	
Utah Sales (MWh)	24,669,334		Line 4

Requested EBA Recovery	\$ 36,820,057	,	Line 26

Proposed Tariff Sheets

- 18. The Company's proposes to spread the deferred EBAC across customer classes for the Deferral Amounts consistent with the NPC Allocator agreed to by the parties and approved by the Commission in the 2014 GRC, as shown in **Exhibit RMP__(RMM-1)**, attached to the direct testimony of Mr. Robert M. Meredith.
- 19. The Company proposes to allocate the 2020 EBA deferral and revenues to those customer classes that are not reflected in the NPC Allocators, such as Schedule 21 and Schedule 31 customers, as described in Mr. Meredith's direct testimony.

20. The table below summarizes the proposed price changes by tariff rate schedule. Mr. Meredith's **Exhibit RMP__(RMM-1)** displays the Company's proposed rate spread, as discussed above. The proposal would result in an overall increase of approximately 1.0 percent to customers in Utah. Mr. Meredith's **Exhibit RMP__(RMM-2)** includes billing determinants and the calculations of the proposed EBA rates in this case. **Exhibit RMP__(RMM-3)** contains the proposed rates and revisions for Tariff Schedule 94.

Customer Class	Proposed Percentage Change 2020 EBA
Residential	
Schedules 1, 2, 3	0.8%
General Service	
Schedule 23	0.9%
Schedule 6	1.0%
Schedule 8	1.1%
Schedule 9	1.4%
Irrigation	
Schedule 10	1.1%
Public Street and Area Lighting Schedules	
Schedules 7, 11, 12	0.6%
Schedule 15 - Metered Outdoor Lighting	1.1%
Schedule 15 - Traffic Signal Systems	0.8%
Total	1.0%

WHEREFORE, Rocky Mountain Power respectfully requests that the Commission approve rates as provided in Tariff Schedule 94 to recover the costs identified in this Application, as filed, with an effective date of March 1, 2021.

DATED this 16th day of March 2020.

Respectfully submitted,

ROCKY MOUNTAIN POWER

Mary Penfield

Adviser, Regulatory Operations

1	Q.	Please state your name, business address, and present position with PacifiCorp
2		d/b/a Rocky Mountain Power ("Rocky Mountain Power" or the "Company").
3	A.	My name is David G. Webb and my business address is 825 NE Multnomah Street,
4		Suite 600, Portland, Oregon 97232. My title is Manager, Net Power Costs.
5		QUALIFICATIONS
6	Q.	Please describe your education and professional experience.
7	A.	I received a Master of Accountancy degree from Southern Utah University in 1999 and
8		a Bachelor of Science degree in Business Management from Brigham Young
9		University in 1994. I am a Certified Public Accountant licensed in the state of Nevada.
10		I have been employed by PacifiCorp since 2005 and have held various positions in the
11		regulation, finance, fuels, and mining departments. I assumed my current role
12		managing the regulatory net power cost group in 2019.
13	Q.	Have you testified in previous regulatory proceedings?
14	A.	Yes. I have previously provided testimony to the public service commissions in Utah,
15		Wyoming, and Oregon.
16		PURPOSE OF TESTIMONY
17	Q.	What is the purpose of your testimony in this proceeding?
18	A.	My testimony presents and supports the Company's calculation of the Energy
19		Balancing Account ("EBA") deferral for the 12-month period from January 1, 2019
20		through December 31, 2019 ("Deferral Period"). More specifically, I provide the
21		following:
22		• Details supporting the calculation of the Company's request to recover
23		\$36.8 million for excess EBA-related costs, including interest, the Utah-

24		allocated non-fuel savings related to the settlement of the Deer Creek Retiree
25		Medical Obligation, an adjustment for sales made to a special contract
26		customer, and Utah situs resource adjustments included in the EBA for the true-
27		up of solar facilities and the Utah Transition Program for Customer Generators;
28		Discussion of the main differences between adjusted actual net power costs
29		("Actual NPC") and net power costs in rates ("Base NPC"); and
30		Discussion about the Company's participation in the energy imbalance market
31		("EIM") with California Independent System Operator ("CAISO") and the
32		benefits from EIM that are passed through to customers.
33	Q.	Are additional witnesses presenting testimony specifically for the EBA and Tariff
34		Schedule 94 in this case?
35	A.	Yes. Mr. Robert M. Meredith, Director, Pricing and Cost of Service, provides testimony
36		on the proposed Tariff Schedule 94 rates.
37		SUMMARY OF THE EBA DEFERRAL CALCULATION
38	Q.	Please summarize the Company's EBA application.
39	A.	The Company's application requests recovery of \$36.8 million in deferred costs,
40		comprised of \$44.0 million of EBA-related costs, a credit of \$2.9 million for savings
41		for the Retiree Medical Obligation, a credit of \$8.7 million for sales made to a special
42		contract customer, a \$1.6 million adjustment for Utah situs resources, and \$2.9 million
43		of interest.
44	Q.	Are there any changes to the EBA calculation?
45	A.	Yes. Adjustments have been included as part of the EBA calculation for the following
46		items:

+ /		•	EBA Carrying Charge rate change from 6% annually to the rate approved by
48			the Commission for the Company's Electric Service Schedule No. 300 in
49			accordance with the Commission's order issued November 14, 2019 in Docket
50			No. 09-035-15.
51		•	An adjustment related to Electric Service Schedule No. Schedule 32 ("Schedule
52			32") contract costs associated with the contract approved by the Commission in
53			Docket No. 18-035-08.
54			EBA DEFERRAL CALCULATION
55	Q.	Pleas	e describe the calculation of the EBA deferral included in this filing.
56	A.	Table	1 below provides a summary of the total EBA deferral and a breakdown of the
57		indivi	dual components of the EBA. Additionally, Exhibit RMP(DGW-1) presents
58		the de	tailed calculation of the EBA deferral on a monthly basis.

Calendar Year 2019 EBA Deferral		Exhibit RMP (DGW-1) Reference
Actual EBA (\$/MWh)	\$ 27.05	Line 5
Base EBA (\$/MWh)	25.25	Line 10
\$/MWh Differential	\$ 1.80	
Utah Sales (MWh)	24,669,334	Line 4
EBA Deferrable*	\$ 43,978,176	Line 12
Incremental Non-Fuel FAS 106 Savings*	(2,947,878)	Line 13
Special Contract Customer Adjustment*	(8,733,909)	Line 16
Utah Situs Resource Adjustment*	1,641,004	Line 17
Total Deferrable	33,937,393	Line 18
Interest Accrued through December 31, 2019	1,212,736	Line 22
Interest Jan 1, 2020 through Mar 31, 2020	385,415	Line 24
Interest Apr 1, 2020 through Feb 28, 2021	1,284,513	Line 25
Requested EBA Recovery	 \$ 36,820,057	Line 26
* Calculated monthly		

The EBA deferral of \$44.0 million is calculated as the difference between the Actual NPC and wheeling revenue and the Base NPC and wheeling revenue, as established in the 2014 general rate case ("GRC"). The calculation of the monthly amount debited or credited into the EBA Deferral Account is based on the following formula:

$$\begin{split} \textit{EBA Deferral}_{\textit{Utah,month}} = \\ & \left[\left(\textit{Actual EBAC}_{\underbrace{\textit{Utah,month}}_{\textit{MWh}}} - \; \textit{Base EBAC}_{\underbrace{\textit{Utah,month}}_{\textit{MWh}}} \right) \times \; \textit{Actual MWh}_{\textit{Utah,month}} \right] \end{split}$$

65

66	Q.	What revenue requirement components are included in the EBA deferral
67		calculation?
68	A.	The EBA deferral calculation consists of two revenue requirement components: NPC
69		and wheeling revenue. NPC are defined as the sum of fuel expenses, wholesale
70		purchase power expenses, and wheeling expenses, less wholesale sales revenue.
71		Wheeling revenue includes amounts booked to FERC account 456.1; revenues from
72		transmission of electricity of others. Collectively these two components are known in
73		the Company's EBA tariff, Schedule No. 94, as Energy Balancing Account Costs
74		("EBAC").
75		The EBA also includes the non-fuel cost savings related to the settlement of
76		Energy West retiree medical benefit obligation as a result of the Deer Creek mine
77		closure.
78	Q.	How are the Utah-allocated Actual NPC calculated?
79	A.	Utah-allocated Actual NPC are calculated in three steps. First, unadjusted actual NPC
80		are established on a total-company basis. Second, adjustments are made to the
81		unadjusted actual NPC to apply certain regulatory adjustments and to remove out-of-
82		period accounting entries. Third, the adjusted total-company Actual NPC are allocated
83		to Utah on the basis of the 2017 Protocol.
84	Q.	What were the total-company adjusted Actual NPC for the Deferral Period and
85		how were they determined?
86	A.	The total-company adjusted Actual NPC in the Deferral Period were approximately
87		\$1,648 million. This amount captures all components of NPC as defined in the
88		Company's GRC proceedings and modeled by the Company's Generation and

89		Regulation Initiative Decision Tool ("GRID") model. Specifically, it includes amounts
90		booked to the following FERC accounts:
91		Account 447 - Sales for resale, excluding on-system wholesale sales and other
92		revenues that are not modeled in GRID
93		Account 501 – Fuel, steam generation; excluding fuel handling, start-up fuel (gas and
94		diesel fuel, residual disposal) and other costs that are not modeled in GRID
95		Account 503 – Steam from other sources
96		Account 547 – Fuel, other generation
97		Account 555 - Purchased power, excluding the Bonneville Power Administration
98		residential exchange credit pass-through if applicable
99		Account 565 – Transmission of electricity by others
100		During 2019, no new accounts were used in the Company's SAP accounting
101		system to track components of NPC and wheeling revenue.
102	Q.	What adjustments are made to Actual NPC and why are they needed?
103	A.	The Company adjusts Actual NPC to reflect the ratemaking treatment of several items,
104		including:
105		• Out of period accounting entries booked in the Deferral Period that relate to
106		operations prior to implementation of the EBA in October 2011;
107		Buy-through of economic curtailment by interruptible industrial customers;
108		• Revenue from a contract related to the Leaning Juniper wind resource;
109		• Situs assignment of the generation from Oregon solar resources procured to
110		satisfy Oregon Revised Statute 757.370 solar capacity standard;

111		• Situs assignment of Oregon allocated excess amortization related to a prepaid
112		wheeling expense;
113		• Situs assignment of certain Utah resources;
114		 Coal inventory adjustments to reflect coal costs in the correct period;
115		 Legal fees related to fines and citations included in the cost of coal;
116		Adjustments related to liquidated damages that occurred outside the Deferral
117		Period (all liquidated damage fees per a coal supply agreement are booked in
118		accordance with generally accepted accounting principles); and,
119		• Utah Schedule 32 contract.
120		Additional details regarding each of these adjustments and the impact on NPC are
121		provided in Additional Filing Requirement 15.
122	Q.	What allocation methodology did the Company use to calculate the EBA Deferral
123		Account balance?
124	A.	The settlement stipulation in the 2014 GRC set the Base NPC effective September 1,
125		2014 using the Commission Order Method which was originally approved by the
126		Commission in Docket No. 09-035-15. The Base NPC and Commission Order Method
127		were detailed in Exhibit A of the stipulation in the 2014 GRC. Attached Exhibit
128		RMP(DGW-1) calculates the EBA deferral using the Commission Order Method
129		for the entire Deferral Period.
130	Q.	Does the calculation of the EBA deferral include carrying charges?
131	A.	Yes. In accordance with the Commission's orders dated March 2, 2011, February 16,
132		2017, and November 14, 2019 in Docket No. 09-035-15, carrying charges accrue on
133		the monthly EBA deferral at an annual rate of six percent through December 31, 2019.

Effective January 1, 2020 the carrying charge has been changed to the interest rate for Residential and Non-residential Deposits in Electric Service Schedule No. 300. Carrying charges accrue monthly during the Deferral Period, the review period, and will continue to accumulate during the collection period.

Q. Please describe the impact of the special contract customer in the EBA.

Α.

Α.

The special contract customer pays rates specified in the contract and is not subject to new EBA rates approved on or after December 1, 2016. The NPC associated with serving the special contract customer are embedded in Actual NPC. As Utah tariff customers benefit from the special contract remaining on the Company's system and paying a portion of the total revenue requirement, the EBA deferral amount associated with the special contract customer is shared among Utah tariff customers. Additionally, a certain portion of the sales to the special contract customer are at a price different than NPC in base rates, and an adjustment is made to the EBA in which the Utah tariff customers share the variance between the contract price and Base NPC with the Company.

Q. Please describe the adjustment for sales made to a special contract customer.

Per the stipulation in Docket No. 16-035-33, the EBA includes an adjustment for certain sales made to the special contract customer. The adjustment calculates monthly the difference between the average monthly contract price paid and NPC in base rates ("Special Contract Differential"). The Special Contract Differential is then multiplied by the megawatt-hour ("MWh") sales to the special contract customer to calculate the dollar amount of the variance. The difference is then subject to a symmetrical deadband

	of \$350,000. For the 2020 EBA, the adjustment for sales made to a special contract
	customer is an \$8.7 million credit.
Q.	Please describe the Utah Situs Resource Adjustment.
A.	The Utah Situs Resource Adjustment accounts for the Utah situs costs of certain
	resources, namely the Utah Subscriber Solar Program and the Utah Transition Program
	for Customer Generators.
Q.	Please describe the Utah Subscriber Solar Program.
A.	The Commission approved the "Subscriber Solar Program Rider - Optional" Tariff
	Schedule 73, effective March 28, 2016, which enables participating Utah customers to
	purchase electricity from a specific utility-scale solar resource. Customers can elect to
	purchase blocks of energy at a set amount each month, and the value of any excess,
	unused block energy is rolled forward to future months. Participating blocks of energy
	purchased are subject to rates specific to Schedule 73 and are not subject to EBA
	adjustment rate schedule changes (Schedule 73, Special Condition 15).
Q.	Please describe the adjustment to the EBA for the Utah Subscriber Solar Program
	Resource.
A.	Under the stipulation in Docket No. 15-035-61, the solar resource is included as a Utah-
	situs resource in net power costs. The generation costs of the solar resource are
	compared to the generation charges paid by solar subscriber customers and the
	difference is either recovered from or credited back to Utah customers through the
	EBA. In addition, there will be no load adjustments and no change in allocation factors
	due to the program. The EBA adjustment for subscriber solar is approximately
	\$20 thousand.
	A. Q. A. Q.

- 179 Q. Please describe the Utah Transition Program for Customer Generators
 180 ("Transition Program").
- 181 A. In Docket No. 14-035-114, the Commission approved the Transition Program Tariff
 182 Schedule 136, effective November 15, 2017, which measures the difference between
 183 the electricity supplied by the Company and the electricity generated by an eligible
 184 customer-generator and fed back to the electric grid at 15-minute intervals. The
 185 program enables eligible customers to offset part or all of their own electrical
 186 requirements with self-generation and receive export credits for energy fed back to the
 187 electric grid.
- 188 Q. Please describe the adjustment to the EBA for the Transition Program.
- 189 A. Under the stipulation in Docket No. 14-035-114, the difference between export credits 190 to eligible customers and the market value of the exports is recovered from or credited 191 back to Utah customers through the EBA. The EBA adjustment for the Transition 192 Program is approximately \$1.6 million.
- 193 Q. Please describe the adjustment to the EBA for the Schedule 32 Contract.
- 194 Electric Service Schedule No. 32 is a unique retail service option available to any A. 195 customer who would otherwise qualify for Electric Service Schedules 6, 8, or 9 that 196 desires to receive all or part of its electricity from a renewable energy facility. This 197 allows the Company to meet its customers' renewable energy goals while protecting 198 the Company's other customers from the financial impacts of another customer's 199 preference. Currently, the only customer with a contract pursuant to Schedule 32 is with 200 the University of Utah and was approved in Docket No. 18-035-08. The contract is a 201 pass-through and has no impact on the EBA.

202	Q.	Please describe the adjustment for the Deer Creek Retiree Medical Obligation.
203	A.	The 2020 EBA includes the non-fuel savings related to the settlement of Deer Creek
204		Retiree Medical Obligation. In the 2020 EBA the non-fuel savings are allocated to Utah
205		using the system overhead ("SO") allocation factor from the June 30, 2019 results of
206		operations. At the time of this filing, the calendar year 2019 SO allocation factor was
207		not yet available.
208		DIFFERENCES IN NPC
209	Q.	On a total-Company basis, what was the difference between Actual NPC and Base
207	_	• •
210		NPC for the Deferral Period?
	A.	NPC for the Deferral Period? On a total-Company basis, Actual NPC for the Deferral Period were \$1,648 million,
210		
210 211		On a total-Company basis, Actual NPC for the Deferral Period were \$1,648 million,
210211212		On a total-Company basis, Actual NPC for the Deferral Period were \$1,648 million, approximately \$157 million more than Base NPC for the Deferral Period. Table 2 below

	T	OTAL
Base NPC	\$	1,491
Increase/(Decrease) to NPC:		
Wholesale Sales Revenue		214
Purchased Power Expense		82
Coal Fuel Expense		(145)
Natural Gas Expense		8
Wheeling and Other Expense		(4)
Total Increase/(Decrease)		154
2014 GRC Settlement Adjustment		3
Total Company NPC Difference	\$	157
Adjusted Actual NPC	\$	1,648

- Q. Please describe the Base NPC the Company used to calculate the NPC component of the EBA deferral.
- 219 A. The Base NPC for the 2020 EBA was set in the 2014 GRC and became effective 220 September 1, 2015. Base NPC used a test period of 12 months from July 2014 through 221 June 2015 and set total-company Base NPC at \$1,491 million.
- 222 Q. Please describe the primary differences between Actual NPC and Base NPC.
- As shown in Table 2, Actual NPC were higher than Base NPC due to a \$214 million reduction in wholesale sales, an \$82 million increase in purchased power expense, and an \$8 million increase in natural gas expense. The items were partially offset by a

226		\$145 million reduction in coal fuel expense, and a \$4 million reduction in wheeling and
227		other expenses.
228	Q.	Please explain the changes in wholesale sales revenue.
229	A.	The decline in wholesale sales revenues relative to Base NPC was a combination of
230		lower market prices, a reduction in the wholesale sales volumes of market transactions
231		(represented in GRID as short-term firm and system balancing sales), and expired
232		contracts.
233		Revenue from market transactions is approximately \$214 million lower than
234		Base NPC due to lower market prices and lower volume of market sales transactions.
235		The average price of actual market sales transactions was \$4.71/MWh, or 12 percent
236		lower than the average price in Base NPC. Actual wholesale market volumes were
237		4,798 gigawatt-hours ("GWh"), or 48 percent lower than the Base NPC.
238	Q.	Please explain the changes in purchased power expense.
239	A.	Since the 2014 GRC that set Base NPC there have been multiple changes to the
240		Company's long-term purchased power expense including the addition of 19 new large
241		qualifying facility contracts, and the expiration of the Hermiston purchase power
242		agreement ("PPA") and the Georgia-Pacific Camas contract. The Hermiston PPA and
243		the Georgia-Pacific Camas contract expirations resulted in lower purchased power
244		costs of \$91.3 million.
245		Additionally, expenses from market transactions (represented in GRID as short-
246		term firm and system balancing purchases) increased by \$65.4 million compared to
247		Base NPC. Actual market purchases were 507 GWh (10 percent) higher than Base NPC

248		and the average price of actual market purchases transactions was \$18.10/MWh
249		(59 percent) higher than Base NPC.
250	Q.	Please explain the changes in wheeling expenses.
251	A.	Actual long-term wheeling expense decreased by approximately \$8.5 million when
252		compared to Base NPC due to expired wheeling contracts. This was partially offset by
253		an increase of \$6.8 million of short-term wheeling expenses.
254	Q.	Please discuss the changes in coal fuel expense.
255	A.	The driver of the decrease in coal fuel expense is a coal generation volume decrease of
256		8,129 GWh (19 percent) compared to Base NPC. The average cost of coal generation
257		increased only slightly from \$19.77/MWh in Base NPC to \$20.22/MWh in the Deferral
258		Period, but the lower generation results in an overall decrease of approximately
259		\$145 million in coal fuel expense.
260	Q.	Please describe the changes in natural gas fuel expense.
261	A.	The total natural gas fuel expense in Actual NPC increased by \$8 million compared to
262		Base NPC. The main driver of the increase is the average cost of natural gas generation
263		decreased from \$39.73/MWh in Base NPC to \$23.79/MWh (40 percent) in the Deferral
264		Period, but reduced costs were offset by an increase in natural gas generation volume
265		of 5,030 GWh (72 percent) above Base NPC during the Deferral Period.
266	Q.	Please provide an update of the Enbridge natural gas pipeline rupture and its
267		impact on Company operations and costs.
268	A.	On October 9, 2018, the Enbridge natural gas pipeline that transports natural gas
269		produced in the Western Canadian Sedimentary Basin to consumers in British
270		Columbia ("B.C.") and, through interconnecting pipelines, the Northwestern United

States ("U.S."), experienced a massive rupture. The pipeline was brought back into service in late October 2018, however, at a reduced capacity until testing of the many segments of the pipeline were completed. Spot natural gas prices at the Sumas B.C.-U.S. border trading point traded as high as \$159 per million British thermal units on days of intense demand due to cold weather and reduced natural gas supply in the first quarter of 2019.

The pipeline rupture and reduced operating capacity impacted electricity prices primarily at the Mid-Columbia power market hub, but also increased electricity prices at other trading points where PacifiCorp transacts. Because of PacifiCorp's geographical and resource diversity, the impact to the Company was not as severe as other utilities and power producers that have a high reliance on Sumas natural gas supplies. PacifiCorp has one natural gas-fired generator—the Chehalis plant—that is sourced from the Sumas natural gas hub. Due to the pipeline rupture, there were times of limited availability of natural gas flowing to the Sumas gas hub and limited ability to withdraw out of storage facilities at Jackson Prairie. With the inability to run Chehalis due to limited gas availability and supplies, plus the impact of uneconomical market conditions, the result contributed to higher prices at Mid-Columbia ultimately increasing net power costs.

IMPACT OF PARTICIPATING IN THE EIM

- Q. Are the actual benefits from participating in the EIM with CAISO included in the EBA deferral?
- 292 A. Yes. Participation in the EIM provides benefits to customers in the form of reduced 293 Actual NPC. The EIM benefits are embedded in Actual NPC through lower fuel and

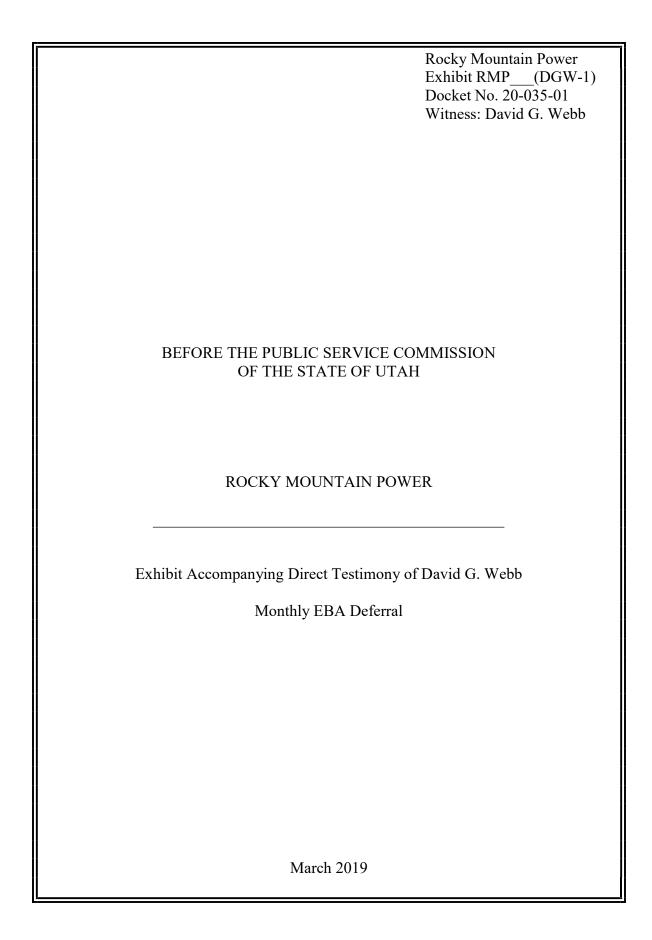

297	Q.	How does the Company calculate its actual EIM benefits?
296		benefit for the deferral period was approximately \$57.2 million.
295		EIM imports and exports, the inter-regional benefit. The Company's EIM inter-regional
294		purchased power costs. The Company is able to calculate the margin realized on its

Using actual information from the EIM, including five- and 15-minute pricing, the Company identifies the incremental resource that could have facilitated the transfer to an adjacent EIM area or the CAISO in each five-minute interval. The benefit is then calculated as the difference between the revenue received less the expense of generation assumed to supply the transfer. In the event of an import, the benefit is equal to the cost of the import minus the avoided expense of the generation that would have otherwise been dispatched.

Q. Does this conclude your direct testimony?

306 A. Yes.

A.

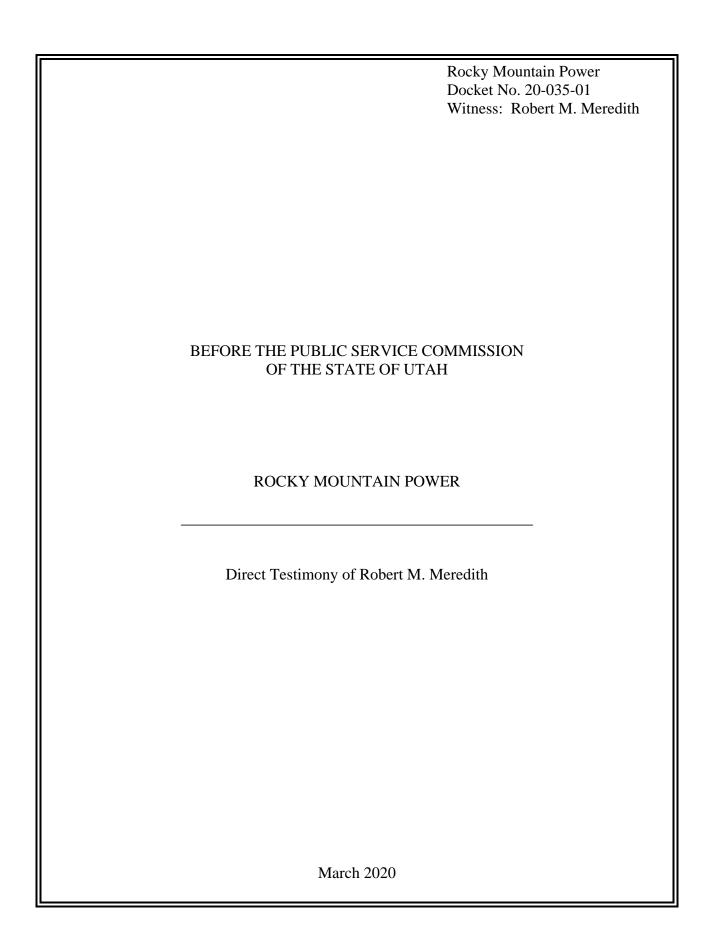

Dec-19 Total		69	\$ 52,460,724 \$ 667,394,916	2,107,526 24,669,334	\$ 24.89 \$ 27.05		\$ 53,488,153 \$ 628,000,000	\$	2,013,529 23,244,285	\$ 24.86 \$ 25.25		\$ 0.03 \$ 1.80	\$ 57,691 \$ 43,978,176	(245,656) (2,947,878)	(584,873) (9,083,909)	350,000	(584,873) (8,733,909)	(63,828) 1,641,004	\$ (836,667) \$ 33,937,393		0.50%	\$ 35,809,838 \$ 33,937,393		\$ 35,150,129 \$ 35,150,129	385,415	1,284,513

1	Q.	Please state your name, business address, and present position with PacifiCorp,
2		dba Rocky Mountain Power ("the Company").
3	A.	My name is Robert M. Meredith. My business address is 825 NE Multnomah Street,
4		Suite 2000, Portland, Oregon 97232. My present position is Director, Pricing and Cost
5		of Service.
6		QUALIFICATIONS
7	Q.	Briefly describe your education and professional background.
8	A.	I have a Bachelor of Science degree in Business Administration and a minor in
9		Economics from Oregon State University. In addition to my formal education, I have
10		attended various industry-related seminars. I have worked for the Company for 15 years
11		in various roles of increasing responsibility in the Customer Service, Regulation, and
12		Integrated Resource Planning departments. I have over nine years of experience
13		preparing cost of service and pricing related analyses for all of the six states that
14		PacifiCorp serves. In March 2016, I became Manager, Pricing and Cost of Service. In
15		June 2019, I was promoted to my current position.
16	Q.	Have you testified in previous regulatory proceedings?
17	A.	Yes. I have previously filed testimony on behalf of the Company in regulatory
18		proceedings in Utah, Wyoming, Idaho, Oregon, Washington, and California.
19		PURPOSE AND SUMMARY OF TESTIMONY
20	Q.	What is the purpose of your testimony?
21	A.	The purpose of my testimony is to present and support the Company's proposed rate
22		spread and rates in Schedule 94 to recover the requested Energy Balancing Account

23		("EBA") deferral amount identified by Company witness Mr. David G. Webb for the
24		12-months ended December 31, 2019 ("2020 EBA").
25	Q.	Please summarize the rate impacts for the proposed change to Schedule 94 for this
26		filing.
27	A.	The change in Schedule 94 is an increase of \$19.5 million, or 1.0 percent. This net
28		change is the difference between the current collection level of \$17.3 million and the
29		new proposed collection level of \$36.8 million for the 2020 EBA. Exhibit
30		RMP(RMM-1), page 1, shows the net impact by rate schedule.
31		PROPOSED EBA RATE SPREAD
32	Q.	What is the 2020 EBA deferral amount in this case?
33	A.	The total 2020 EBA deferral is \$36.8 million, as shown in Table 1 of Mr. Webb's
34		testimony. The Company proposes to recover this amount over one year with rates
35		effective March 1, 2021.
36	Q.	How does the Company propose to allocate the 2020 EBA deferral balance across
37		customer classes?
38	A.	The Company proposes to spread the 2020 EBA deferral across customer rate schedules
39		consistent with the NPC Allocators agreed to by the parties and approved by the
40		Commission in the 2014 general rate case, Docket No. 13-035-184 ("2014 GRC"). The
41		allocators and allocations by rate schedule are shown on page 2 in Exhibit
42		RMP(RMM-1).
43	Q.	How does the Company propose to allocate the 2020 EBA revenue to those
44		customer classes that were not reflected in the NPC Allocators?
45	A.	There are two customer classes—Schedule 21 and Schedule 31—that are subject to the

68	A.	Consistent with the EBA Rate Determination provision in Schedule 94, the proposed
67	Q.	How were the proposed Schedule 94 rates developed for each customer class?
66	Propo	sed Rates for Schedule 94
65		the Subscriber Solar Program that no longer pay for the EBA.
64		The billing determinants were adjusted to account for revenue from loads enrolled in
63		present revenues and the billing determinants set forth in the 2014 GRC Stipulation.
62	A.	The Company has developed the rate spread using the Commission approved Step 2
61		to allocate the 2020 EBA?
60	Q.	What present revenues and billing determinants is the Company proposing to use
59		\$36.8 million.
58		proportionally adjusted for all customer classes to collect a total target amount of
57	A.	The results of the 2020 EBA deferral spread based on the NPC Allocator are then
56		adjustments to the NPC Allocators?
55	Q.	How does the Company propose to collect the 2020 EBA deferral after these
54		Customer 1 is based on the overall 2020 EBA percentage to tariff customers in Utah.
53		of Utah in Docket No. 17-035-72, the 2020 EBA revenue allocation for Contract
52	A.	Consistent with the terms of the contract approved by the Public Service Commission
51		Customer 1?
50	Q.	How does the Company propose to allocate the 2020 EBA revenue to Contract
49		Schedule 9 consistent with the rate spreads approved in prior EBAs.
48		Company proposes to apply the same percentage change to these customer classes as
47		and therefore not reflected in the NPC Allocators. For the customer classes, the
46		EBA but were not included in the Company's cost of service studies in the 2014 GRC

69 rates for each customer class were determined by dividing the allocated EBA deferral 70 amount to each rate schedule and applicable contract by the corresponding 2014 GRC 71 Step 2 forecast Power Charge and Energy Charge revenues. The EBA rate is a 72 percentage applied to the monthly Power Charges and Energy Charges. 73 Please describe Exhibit RMP (RMM-2). Q. 74 Exhibit RMP (RMM-2) contains the billing determinants, including an adjustment A. 75 to remove revenue from Subscriber Solar Program participants, and the calculations of 76 the proposed EBA rates in this case. 77 Please describe Exhibit RMP___(RMM-3). Q. Exhibit RMP (RMM-3) contains the proposed tariff rate revisions for Schedule 94. 78 A. 79 0. Did you include workpapers with this filing? Yes. Workpapers have been included with this filing that detail the calculations shown 80 A. 81 in my exhibits. 82 Does this conclude your direct testimony? Q.

83

A.

Yes, it does.

Schedule 8	2.45%
Schedule 9	2.95%
Schedule 9A	3.27%
Schedule 10	2.18%
Schedule 11*	1.06%
Schedule 12*	1.06%
Schedule 15 (Traffic and Other Signal Systems)	1.92%
Schedule 15 (Metered Outdoor Nighttime Lighting)	2.85%
Schedule 21	5.96%
Schedule 22	2.95%
Schedule 23	1.83%
Schedule 31	**
Schedule 32	**

^{*} The rate for Schedules 7, 11 and 12 shall be applied to the Charge per Lamp.

ELECTRIC SERVICE REGULATIONS: Service under this Schedule will be in accordance with the terms of the Electric Service Agreement between the Customer and the Company. The Electric Service Regulations of the Company on file with and approved by the Public Service Commission of the State of Utah, including future applicable amendments, will be considered as forming a part of and incorporated in said Agreement.

Issued by authority of Report and Order of the Public Service Commission of Utah in Docket No. 20-035-01/Docket No. 20-035-T01

FILED: March 16, 2020 **EFFECTIVE**: March 1, 2021

^{**} The rate for Schedules 31 and 32 shall be the same as the applicable general service schedule.
