**Idaho Meter Aggregation Requirements**

**Aggregation of Meters for Net Metering Interconnection.**

Customers can transfer financial credits once per year between meters that are owned by the same customer. To transfer excess financial credits customers must submit a written request to the company between March 1 and March 31 each year. In addition to be eligible the meters must meet the following requirements:

- (a) The additional meter must be for the same customer;
- (b) The additional meter must be located on or contiguous to the premises on which the meter with excess financial credits is located;
- (c) The additional meter must be served by the same primary feeder; and
- (d) The additional meter must be on the same rate schedule.

If the request meets the eligibility requirements, the company will transfer the credit within 30 days from receiving the request. A \$10.00 processing fee will apply to each meter receiving the excess energy credits at the time of the transfer.
