**Utah Meter Aggregation Requirements**

**R746-312-15. Aggregation of Meters for Net Metering Interconnection.**

(1) For the purpose of measuring electricity usage under the net metering program, a public utility must, upon request from an interconnection customer, aggregate for billing purposes a meter to which the net metering facility is physically attached ("designated meter") with one or more meters ("additional meter") in the manner set out in this section. This rule is applicable only when:

- (a) the additional meter is located on or adjacent to the premises of the electrical corporation's customer, subject to the electrical corporation's service requirements;
- (b) the additional meter is used to measure only electricity used for the interconnection customer's requirements; **\*\* (Note, meters must be under the same account number) \*\***
- (c) the designated meter and the additional meter are subject to the same rate schedule; and
- (d) the designated meter and the additional meter are served by the same primary feeder.

**P.S.C.U. No. 50 ELECTRIC SERVICE SCHEDULE NO. 136**

At the time of notice to the Company, the customer-generator must identify the designated meter at which Exported Customer-Generator Energy will be measured and netted, and the specific aggregated meters and a rank order for the aggregated meters to which the computed export credit is to be applied. The Customer may change the designated meter and ranking once in a 12-month period. If a change in the designated meter requires installation of a new meter capable of measuring 15-minute intervals, a new meter fee may apply. Aggregation services for billing purposes will be subject to the following fees:

- (e) two to five aggregated meters - \$2.00 per meter per month
- (f) six or more aggregated meters - \$25.00 per month flat fee
