Changes to wattsmart Business Program in Idaho

To increase program participation and adoption of energy efficient lighting measures, incentives for mid-market lighting and exterior retrofit lighting offerings are being increased. This incentive increase is meant to encourage the promotion and sales of specific eligible lighting equipment and thereby increase customer participation in the mid-market and exterior retrofit lighting programs. The incentives being increased are highlighted in the tables below and will become effective September 23, 2019. Incentives that are not highlighted will remain unchanged.

Lighting equipment must be on current Qualified Equipment List. wattsmart Business incentives will continue to pay up to 70% of the qualifying Purchase Transaction-level Costs per measure, and these are subject to Rocky Mountain Power approval.

It is Rocky Mountain Power’s intent to make ongoing adjustments to offered incentives for certain measures in response to market conditions (changes in material costs, product availability, price competition, etc.), and stay in alignment with the Company’s defined savings targets, incentive budget, and cost-effectiveness requirements.
