The table above lists currently offered incentive rates. The maximum allowable incentive rates for energy-saving measures are posted in the most current Schedule 140 tariff as approved by the Idaho Public Utilities Commission. To see the full incentive lists and details, please visit **RockyMountainPower.net/IDIncentives.*

When funds are not available from within your organization, securing financing may be your best option. Rocky Mountain Power partners with National Energy Improvement Fund, specialists in financing energy-efficiency projects, to help in these situations. This financing solution is provided as a convenience, and customers are free to use any lender of their choice. To learn more, visit **RockyMountainPower.net/Financing**.

CUSTOM ANALYSIS AND INCENTIVES

For custom projects that are beyond the scope of typical upgrades on the incentive lists, we have a team of energy experts to help you evaluate options, estimate savings and make a Wattsmart choice before you make a purchase.

	Incentive	Incentive Caps*
Custom incentives for qualifying measures not on the incentive list (Examples: large compressed air, industrial pump/fan VFDs)	$0.15 per annual kilowatt-hour savings	70% of project costs and one-year simple payback

**The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.*

Incentives for the most common new construction upgrades can be found on our lists. If you plan to install unique systems – not on the list – contact us early in your process for a custom analysis.

PUTTING WATTSMART BUSINESS TO WORK FOR YOU

For the bulk of your typical upgrades, you can apply post-purchase either on your own or through a Wattsmart Business Trade Ally. Custom projects and some lighting retrofits require pre-authorization and may require an upfront inspection.

Here is the path to participation for projects like these:

1. YOU SUBMIT AN APPLICATION: After you identify the project(s), your first step is to submit a general application. Applications can be found at **Wattsmart.com**.

2. WE PROVIDE A PRE-INSPECTION /ENERGY ANALYSIS REPORT: Before you remove existing equipment, we may need to inspect it to establish an energy baseline. Our inspection will identify efficiency options and help you understand the financial benefits of your investment. It is crucial we do this before you purchase anything new.

3. YOU SIGN AN INCENTIVE OFFER: Sign an incentive offer before you purchase equipment. Without a signed offer, you may not be able to receive an incentive.

4. INSTALL YOUR PROJECT: If your project changes, contact us before the completion date in your incentive offer.

5. WE PROVIDE A POST-INSPECTION: We may need to confirm that the new equipment has been installed and is operational. It can be a simple inspection of installed lighting or may require more formal savings verification. The requirements will be in your energy analysis.

6. YOU RECEIVE YOUR CASH INCENTIVE: Congratulations! You will receive your incentive within 45 days of the final inspection, savings verification, and receipt of all necessary cost documentation.
