ADVANCED ROOFTOP CONTROLS CAN HELP TO:

Improve workplace comfort

Improve indoor air quality

Reduce fan usage

Monitor and control remotely via app

**We recommend calling prior to purchasing to confirm eligibility*

continued

Advanced rooftop unit controls offer you:

LOWER UTILITY COSTS

- Customers see a range of 25-60% in HVAC energy savings

LOWER MAINTANENCE COSTS

- Improved motor control lessens wear and tear on motors reducing breakdowns.
- Staging equipment reduces mechanical cooling, extending the life of components.

OPTIMIZE SYSTEM PERFORMANCE THROUGH REMOTE MONITORING

- Controls monitor system performance and provide alerts and diagnostic information.
- Adjust system settings through remote access.

ENHANCE INDOOR AIR QUALITY

- Balanced CO₂ levels mean better air and a healthier work environment.

IMPROVE COMFORT

- Reduce equipment noise.
- Reduce feeling of “draftiness.”
- Reduce temperature swings.

“Our office’s architecture is a challenging space for any HVAC system. The new controls package allows us to easily manage our heating and cooling needs – optimizing efficiency, employee comfort and reducing our energy usage. We are extremely pleased with the outcome.”

– George Osmun
