Notes for interior lighting system retrofit incentives:

1. To be eligible for the incentives listed, the new lighting system must use less energy than the existing lighting system being replaced or the baseline lighting system as determined by Rocky Mountain Power.
2. Large customers that elect to replace fixtures, but do not also install controls, may still be eligible to receive an incentive if they also install qualifying incentivized non-lighting project in conjunction with the lighting upgrade that Rocky Mountain Power approves instead of adding controls. For more information, see application supplement for Lighting Controls Alternative Eligibility, or contact Rocky Mountain Power at 855-805-7231. Alternative eligibility options may include the following:
   a. Custom
      i. Identify potential energy savings project, must describe project scope and savings potential
      ii. For details, please contact Rocky Mountain Power at 855-805-7231
   b. Energy Project Pipeline
      i. Identify proposed or scheduled energy savings projects, likely to occur over next 12 months, must describe project scope and savings potential
      ii. Submit 12-month project pipeline details and schedule
   c. ARC
      i. Identify the number of RTUs on building
      ii. See ARC Supplemental Application for details
   d. Applications will be reviewed and approved by the lighting program staff on a case-by-case basis
3. Customers may receive incentives for qualified replacement lamps through a point of purchase incentive by purchasing from approved distributors, or by submitting a post-purchase application. Please contact Rocky Mountain Power for additional information.
4. For the list of equipment with available Lighting Instant Incentives, see the Lighting Instant Incentives table. Where eligible for Lighting Instant Incentives as part of a retrofit project, Lighting Instant Incentive quantity limits do not apply.
5. Incentives are capped at 70 percent of energy efficiency project costs and will not be available to reduce the energy efficiency project simple payback below one year. Energy efficiency project costs are subject to approval by Rocky Mountain Power.
6. Eligible retrofit lighting equipment is defined in qualified equipment lists posted on the Utah energy efficiency section at Wattsmart.com.
7. Per International Energy Conservation Code 2018 (IECC 2018) and program requirements, parking garages and areas under parking decks are considered interior spaces. Top decks are considered exterior spaces.
8. Qualified make and model numbers need to be entered into lighting calculator tool.
9. The Customer or Owner may receive only one financial incentive from Rocky Mountain Power per measure. Incentives listed in the table above cannot be combined with incentives received either through the point of purchase Lighting Instant Incentive offer or the Home Energy Savings program.
10. Energy savings are subject to approval and will be offered at Rocky Mountain Power’s discretion. Energy Efficiency Project costs are subject to Rocky Mountain Power approval. Certain lighting technologies/upgrades have been deemed ineligible for incentives.
11. Exterior fixtures are by default considered dusk to dawn. Any other operating schedule must be documented and verified.
12. In cases where controls are required for eligibility, and there are existing controls, the new control strategy must result in higher savings than the existing controls system in order to qualify for incentives. This can be achieved by replacing or adding to the existing controls system.

Note: See Lighting Instant Incentives and See Note 2/3 for full details.

---

**Note:** Wattsmart is registered in U.S. Patent and Trademark Office.
Notes for exterior lighting system retrofit incentives:

1. To be eligible for the incentives listed, the new lighting system must use less energy than the existing lighting system being replaced or the baseline lighting system as determined by Rocky Mountain Power.
2. Large customers that elect to replace fixtures, but do not also install controls, may still be eligible to receive an incentive if they also complete a qualifying incentivized non-lighting project in conjunction with the lighting upgrade that Rocky Mountain Power approves instead of adding controls. For more information, see the application supplement for Lighting Controls Alternative Eligibility, or contact Rocky Mountain Power at 855-805-7231. Alternative eligibility options may include the following:
   a. Custom
      i. Identify potential energy savings project, must describe project scope and savings potential
      ii. For details, please contact Rocky Mountain Power at 855-805-7231
   b. Energy Project Pipeline
      i. Identify proposed or scheduled energy saving projects likely to occur over next 12 months, must describe project scope and savings potential
      ii. Submit 12-month project pipeline details and schedule
   c. ARC
      i. Identify the number of RTUs on building
      ii. See ARC Supplemental Application for details
3. Customers may receive incentives for qualified replacement lamps through a point of purchase incentive by purchasing from approved distributors, or by submitting a post-purchase application.
4. For the list of equipment with available Lighting Instant Incentives, see the Lighting Instant Incentives table. Where eligible for Lighting Instant Incentives as part of a retrofit project, Lighting Instant Incentive quantity limits do not apply.
5. Incentives are capped at 70 percent of energy efficiency project costs and are not available to reduce the energy efficiency project simple payback below one year. Energy efficiency project costs are subject to approval by Rocky Mountain Power.
6. Eligible retrofit lighting equipment is defined in qualified equipment lists posted on the Utah energy efficiency section at Wattsmart.com.
7. Per International Energy Conservation Code 2018 (IECC 2018) and program requirements, parking garages and areas under parking decks are considered interior spaces. Top decks are considered exterior spaces.
8. Qualified make and model numbers need to be entered into lighting calculator tool
9. The Customer or Owner may receive only one financial incentive from Rocky Mountain Power per measure. Incentives listed in the table above and cannot be combined with incentives received either through the point of purchase Lighting Instant Incentive offer or the Home Energy Savings program.
10. Energy savings are subject to approval and are offered at Rocky Mountain Power’s discretion. Energy Efficiency Project costs are subject to Rocky Mountain Power approval. Certain lighting technologies/upgrades have been deemed ineligible for incentives.
11. Exterior fixtures operating schedules are considered dusk to dawn. Any other operating schedule must be documented and verified.
12. In cases where controls are required for eligibility, and there are existing controls, new control strategies must result in higher savings than the existing controls system in order to qualify for incentives. This can be achieved by replacing or adding to the existing controls system.
# Incentives for Lighting New Construction/Major Renovation

</tr>
</tbody>
</table>

**Notes for lighting incentives for new construction/major renovation projects:**

1. Rocky Mountain Power requires LED fixtures to be listed as Premium level on the following website: DesignLights Consortium – [www.designlights.org](http://www.designlights.org)
2. Project cost caps of 70% and one-year simple payback caps apply to new construction and major renovation projects that are not subject to state energy code. The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.
3. Exterior lighting controls required by the applicable version of the state energy code are not eligible for incentives.
4. Note: The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.
## INCENTIVES FOR MOTORS

<table>
<thead>

<td>$65/horsepower</td>
</tr>
<tr>
<td>Green Motor Rewinds</td>
<td>≥ 15 and ≤ 5,000 horsepower</td>
<td>--</td>
<td>Must meet GMPG Standards</td>
<td>$1/horsepower (See note 3)</td>
</tr>
</tbody>
</table>

### Notes for other motor incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Throttling or bypass devices, such as inlet vanes, bypass dampers, three-way valves, or throttling valves must be removed or permanently disabled to qualify for HVAC fan or pump VFD incentives. VFDs required by or used to comply with the applicable version of the energy code are not eligible for incentives. Savings will only be realized for installations where a variable load is present.
3. For Green Motor Rewinds, the participating electric motor service center is paid $2/horsepower for eligible Green Motor Rewinds. A minimum of $1/horsepower is paid by the service center to the customer as a credit on the motor rewind invoice. The balance is retained by the service center. Green Motor Rewind motors that are installed or placed in inventory may qualify for an incentive.
4. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

ECM = Electronically Commutated Motor  
GMPG = Green Motors Practices Group  
HVAC = Heating, Ventilation and Air Conditioning  
NEMA = National Electrical Manufacturers Association  
VFD = Variable Frequency Drive

</tbody>
</table>

**Notes for HVAC equipment incentives:**

1. Equipment that meets or exceeds the efficiency requirements listed for the size category in the above table may qualify for the listed incentive. Equipment must meet all listed efficiency requirements to qualify for the listed incentives.
2. PTHPs can replace electric resistive heating, which must be removed.
3. Incentives for heat pumps are available per ton of cooling capacity ONLY. No incentives are paid per ton of heating capacity. Heat pumps must meet both the cooling mode and heating mode efficiency requirements to qualify for per ton cooling efficiency incentives.
4. Equipment size categories and capacities are specified in terms of net cooling capacity at AHRI standard conditions as determined by AHRI Standard 210/240 for units < 65,000 Btu/hr, AHRI Standard 340/360 for units ≥ 65,000 Btu/hr, AHRI Standard 310/380 for PTAC and PTHP units, and AHRI Standard 1230 for VRF systems.
5. Ground- and water-source heat pumps must meet or exceed listed efficiency requirements when rated in accordance with ISO-13256-1 to qualify for the listed incentive.
6. Efficiency requirements align with the Unitary Air-conditioning and Heat Pump Specification maintained by the Consortium for Energy Efficiency for equipment with heating sections other than electric resistance. CEE minimum efficiency requirements are listed at Wattsmart.com.
7. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

AHRI = Air-conditioning, Heating, and Refrigeration Institute  
CEE = Consortium for Energy Efficiency  
COP = Coefficient of Performance  
EER = Energy Efficiency Ratio  
HSPF = Heating Seasonal Performance Factor  
HVAC = Heating, Ventilation and Air Conditioning  
IEER = Integrated Energy Efficiency Ratio  
IPLV = Integrated Part Load Value  
PTAC = Packaged Terminal Air Conditioner  
PTHP = Packaged Terminal Heat Pump  
SEER = Seasonal Energy Efficiency Ratio  
VRF = Variable Refrigerant Flow

Notes for HVAC equipment and controls incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Incentives paid at $0.15/kWh annual energy savings. IDEC energy savings subject to approval by Rocky Mountain Power.
3. Incentives paid at $0.15/kWh annual energy savings. Chiller energy savings subject to approval by Rocky Mountain Power.
4. Controller units must include an occupancy-based control and include the capability to set back the zone temperature during extended unoccupied periods and set up the temperature once the zone is occupied.
5. Incentives for evaporative pre-coolers are capped at 70 percent of energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year.
6. Energy efficiency project costs are subject to approval by Rocky Mountain Power.
7. Evaporative pre-cooler incentives are subject to the project cost cap and the one-year payback cap.
8. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

CFM = Cubic Feet per Minute
HVAC = Heating, Ventilation and Air Conditioning
IDEC = Indirect-Direct Evaporative Cooling
PTAC = Packaged Terminal Air Conditioner
PTHP = Packaged Terminal Heat Pump

### Notes for building envelope retrofit incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Building must be conditioned with mechanical cooling to be eligible for building envelope incentives.
3. Energy performance of window assemblies and glazing products must be rated in accordance with NFRC. Site-built metal window systems must include a thermal break within the frame or other appropriate NFRC certification to qualify for incentives. Skylights are not eligible to receive incentives in the above table.
4. Window square footage is determined by the dimensions of the entire window assembly, not just the window glass.
5. Incentives for window film are calculated based on film specifications and window orientation at $0.15/kWh annual energy savings. Energy savings subject to approval by Rocky Mountain Power.
6. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

NFRC = National Fenestration Rating Council
SHGC = Solar Heat Gain Coefficient
## INCENTIVES FOR BUILDING ENVELOPE NEW CONSTRUCTION/MAJOR RENOVATION

### Notes for building envelope incentives for new construction/major renovation projects:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Building must be conditioned with mechanical cooling to be eligible for building envelope incentives.
3. Energy performance of window assemblies and glazing products must be rated in accordance with NFRC. Site-built metal window systems must include a thermal break within the frame or other appropriate NFRC certification to qualify for incentives. Skylights are not eligible to receive the incentives in the above table.
4. Window square footage is determined by the dimensions of the entire window assembly, not just the window glass.
5. Compliance with the minimum efficiency requirements of the roof/attic insulation and wall insulation measures may be demonstrated with equivalent U-factors and is subject to approval by Rocky Mountain Power.
6. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

NFRC = National Fenestration Rating Council

See Appliances section for additional incentives.
### Notes for food service equipment incentives:

1. Equipment that meets or exceeds the efficiency requirements listed for the equipment category in the above table may qualify for the listed incentive.
2. Refer to Rocky Mountain Power’s Home Energy Savings program for efficiency requirements and incentives for listed residential appliances used in a business.
3. Incentives are paid at $0.15/kWh annual energy savings. Demand controlled kitchen ventilation exhaust hood energy savings subject to approval by Rocky Mountain Power.
4. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

CEE = Consortium for Energy Efficiency  
MDEC = Maximum Daily Energy Consumption  
V = Association of Home Appliance Manufacturers (AHAM) Volume (cubic feet)

<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Notes for dairy/farm equipment incentives:

1. Equipment that meets or exceeds the efficiency requirements listed above may qualify for the listed incentive.
2. Fan performance must be rated by an independent testing body in accordance with the appropriate ANSI/AMCA standards.
3. Incentives are capped at 70 percent of energy efficiency project costs and incentives will not be available to reduce the energy efficiency project simple payback below one year. Energy savings and energy efficiency project costs are subject to approval by Rocky Mountain Power.
4. Except where noted, all equipment listed in the table is eligible for incentives in both new construction and retrofit projects.
5. The maximum allowable incentive rates for energy-savings measures are posted in the most current Schedule 140 tariff as approved by the Public Service Commission of Utah.

AMCA = Air Movement and Control Association International, Inc.  
ANSI = American National Standards Institute  
VFD = Variable Frequency Drive  
cfm = cubic feet per minute  
W = watt

Wattsmart is registered in U.S. Patent and Trademark Office.
## Incentives for Wheel Line, Hand Line or Other Portable Systems (Retrofit Only)

<table>

</table>
| New rotating sprinkler replacing worn or leaking impact or rotating sprinkler | Leaking or malfunctioning impact or rotating sprinkler | Rotating sprinkler | 1. Fixed-in-place (solid set) systems not eligible.  
2. Incentive limited to two sprinklers per irrigated acre. | $2.50 each |
| New or rebuilt impact sprinkler replacing worn or leaking impact sprinkler | Leaking or malfunctioning impact sprinkler | New or rebuilt impact sprinkler | 1. New nozzle shall be included in new or rebuilt sprinkler. Rebuilt sprinkler shall meet or exceed manufacturer’s specifications.  
2. Fixed-in-place (solid set) systems not eligible.  
3. Incentive limited to two sprinklers per irrigated acre. | $2.25 each |
| New nozzle replacing worn nozzle of same design flow or less on existing sprinkler | Worn nozzle | New nozzle of same design flow or less | 1. Flow rate shall not be increased.  
2. All nozzles on the wheel line or hand line shall be replaced.  
3. Fixed-in-place (solid set) systems not eligible.  
4. Incentive limited to two nozzles per irrigated acre. | $0.50 each |
| New flow-control nozzle for impact sprinkler replacing existing nozzle or worn flow-control nozzle of same design flow or less | Worn nozzle | New flow-control nozzle | 1. Nozzle to be replaced may be fixed orifice or flow-control type.  
2. New flow-control nozzle shall have a flow rating equal to or less than the flow rating of the existing nozzle at 40 psi.  
3. All nozzles on the wheel line or hand line shall be replaced.  
5. Incentive limited to two nozzles per irrigated acre. | $2.75 each |
| New gasket replacing leaking gasket, including main line valve or section gasket, seal or riser cap (dome disk) | Leaking gasket | New gasket, including main line valve or section gasket, seal or riser cap (dome disk) | 1. New gasket must replace leaking gasket.  
2. Fixed-in-place (solid set) systems not eligible.  
3. Incentive limited to two gaskets per irrigated acre. | $2 each |
| New drain replacing leaking drain | Leaking drain | New drain, including drains on pivots and linear | 1. New drain must replace leaking drain.  
2. Fixed-in-place (solid set) systems not eligible.  
3. Incentive limited to two drains per irrigated acre. | $3 each |
| Cut and press or weld repair of leaking wheel line, hand line or portable main line | Leak in wheel line, hand line or portable main line | Cut and pipe press or weld repair | For rebuilds, invoice must show number of rebuild kits purchased and installed. | $10/repair |
| New or rebuilt wheel line leveler replacing leaking or malfunctioning leveler | Leaking or malfunctioning leveler | New or rebuilt leveler | 1. Applies to leaking or malfunctioning levelers only.  
2. For rebuilds, invoice must show number of rebuild kits purchased and installed. | $3 each |
