CEA Interior Lighting	Fixtures	Product must be listed on DLC Horticultural qualified equipment list	\$0.05/kWh
	Replacement Lamps		\$0.03/kWh

Notes for lighting incentives for major renovation projects:

1. Non-CEA Incentives are available to facilities that are only renovating their lighting systems. Facilities that are newly constructed or renovating more than their lighting system can earn incentives through the existing Whole Building New Construction (WBNC) offer.
2. Rocky Mountain Power requires LED fixtures to be listed as Premium level on the following website: DesignLights Consortium – www.designlights.org
3. A custom analysis may be performed and energy savings are subject to approval and will be offered at Rocky Mountain Power’s discretion.
4. Project cost caps of 70% and one-year simple payback caps apply to new construction and major renovation projects that are not subject to state energy code. The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.
5. Exterior lighting controls required by the applicable version of the state energy code are not eligible for incentives.
6. Note: The maximum allowable incentive rates for energy-savings measures are posted in the most current [Schedule 140 tariff](#) as approved by the Public Service Commission of Utah.
7. Facilities that are newly constructed or renovating more than their lighting system do not qualify for the incentive table above. Please see [Whole Building New Construction and Major Renovation](#) for available incentives.
