

LIGHTING REBATES

HOW TO APPLY FOR LIGHTING REBATES

We make it simple to receive lighting rebates. Just follow these steps to start saving energy and money:

- Step 1: Identify which lamps to upgrade at your facility.
- Step 2: Purchase qualified lamps from a vendor of your choice.¹
- Step 3: Complete and submit the [Lamp Rebate Application](#), invoice and required documentation through the [Rebate Application Center](#). Here are instructions for [IRS Form W-9](#).
- Step 4: Install new lamps in your Wyoming facility and enjoy the savings!
- Step 5: Receive rebate check within 45 days of completion of Step 3.

¹ If you are already working with a lighting vendor on a lighting project, please note that only one incentive is available per lamp.

LIGHTING REBATES

If you're a Rocky Mountain Power business customer in Wyoming who likes to take maintenance into your own hands, we're offering Wattsmart Business lighting rebates for LED lighting. So, now as lamps burn out, it's more affordable than ever to replace them with energy-saving LEDs.

SAVE ENERGY AND MONEY

LED lamps on a qualified products list will use 25 to 60 percent less energy than incandescent lighting. This can add up to big bucks considering about 20 percent of commercial electricity use is attributed to lighting. In addition, LEDs emit less heat, which could reduce your cooling costs.

SAVE TIME

LED lamps last 35-50 times longer than incandescent lights. This saves you cost in lamp replacement and reduces the hassle of replacing lights that have burned out.

IMPROVE PERFORMANCE

LEDs provide high-quality color and light that can improve the appearance of your facility. If you are operating a retail space, you could see increased revenue. Improved light quality can also positively impact employee performance. Whether you own or lease, this quick payback investment shines.

ENJOY QUALITY LIGHT

LEDs are specifically engineered to ensure light is delivered evenly. Lamps on a qualified products list have been independently tested to ensure they are producing the quality of light you are used to and expect.

WATTSMART BUSINESS LIGHTING REBATES

Lighting rebates make the investment in this technology easy, and are available for easy-to-install LEDs that fit in many existing light fixtures. Speak to your lighting supplier about the right kind of lamps for your fixtures. If rebates aren't available for the lights you need, or if you are considering a more involved lighting retrofit project, you may still qualify for incentives and project support.² Visit Wattsmart.com for information on all incentives available.

LAMP STYLE	WHAT IT'S CALLED	HOW YOU KNOW IT	INCENTIVE AMOUNT
	MR16 reflector lamp	Mini-spot lights / track head lights	\$1.50 per lamp
	Pin-based lamp	PLC Pin-based lamp < 10 W	\$1 per lamp
