

INCENTIVES FOR NEW CONSTRUCTION/ MAJOR RENOVATION

MEASURE	CATEGORY	ELIGIBILITY REQUIREMENTS	INCENTIVE
Interior Lighting*	No Controls	1. This program uses IECC as the baseline for new construction and major renovation projects. See Wattsmart.com for the version of the IECC in use by the program.	\$0.08/kWh annual energy savings
	Basic or Networked Lighting Controls	2. The total connected interior lighting power for new construction/major renovation projects included in the IECC must be at least 10% lower than the interior lighting power allowance calculated under the applicable version of the IECC. For new construction/ major renovation projects not included in the IECC, the total connected lighting power must be at least 10% lower than common practice as determined by Rocky Mountain Power.	\$0.10/kWh annual energy savings
	Advanced Networked Lighting Controls	3. Energy savings are subject to approval by Rocky Mountain Power.	\$0.14/kWh annual energy savings
Exterior Lighting**	LED outdoor pole/roadway, decorative	< 75W; LED must be listed on qualified equipment list	\$75/fixture
	LED outdoor pole/roadway	≤ 200W; LED must be listed on qualified equipment list	\$100/fixture
	LED outdoor pole/roadway	> 200W; LED must be listed on qualified equipment list	\$400/fixture
	LED canopy/soffit	LED must be listed on qualified equipment list	\$125/fixture
	LED Flood Lights	≥ 100W; LED must be listed on qualified equipment list	\$100/fixture
	Custom LED	Listed LED equipment not indicated above; baseline determined by Rocky Mountain Power. LED must be listed on qualified equipment list.	\$0.08/kWh annual energy savings
	Exterior dimming control	Must control LED technology in an exterior lighting application. Control must be integral to LED fixture or fixture-mounted and reduce fixture power by 75% or more for a minimum of 6 hours per night or when the space has been unoccupied for 15 minutes or less.	\$0.34/watt controlled

Notes for lighting incentives for major renovation projects:

1. Qualified equipment lists referenced in the table are posted on the Wyoming energy efficiency program section at Wattsmart.com.
2. Energy savings are subject to Rocky Mountain Power approval. Certain lighting technologies/upgrades have been deemed ineligible for incentives. Qualified equipment lists referenced in the table are posted on the Wyoming energy efficiency program section at Wattsmart.com.
3. Watt controlled refers to the total wattage of lighting fixtures down circuit from the control.

IECC = International Energy Conservation Code

LED = Light-Emitting Diode

*Project cost caps of 70% and one-year simple payback apply to new construction and major renovation projects that are not covered by the International Energy Conservation Code (IECC). The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.

**Exterior lighting controls required by the applicable version of the state energy code are not eligible for incentives.
