

INCENTIVES FOR LIGHTING NEW CONSTRUCTION/MAJOR RENOVATION

MEASURE	CATEGORY	ELIGIBILITY REQUIREMENTS	CUSTOMER INCENTIVE
Interior Lighting*	No Controls	1. This program uses IECC as the baseline for new construction and major renovation projects. See Wattsmart.com for the version of the IECC in use by the program.	\$0.08/kWh annual energy savings
	Basic or Networked Lighting Controls	2. The total connected interior lighting power for new construction/major renovation projects included in the IECC must be at least 10% lower than the interior lighting power allowance calculated under the applicable version of the IECC. For new construction/major renovation projects not included in the IECC, the total connected lighting power must be at least 10% lower than common practice as determined by Rocky Mountain Power.  3. Energy savings are subject to approval by Rocky Mountain Power.	\$0.10/kWh annual energy savings
	Advanced Networked Lighting Controls		\$0.14/kWh annual energy savings
Exterior Lighting**	LED outdoor pole/roadway, decorative	< 75W; LED must be listed on qualified equipment list	\$75/fixture
	LED outdoor pole/roadway	≤ 200W; LED must be listed on qualified equipment list	\$100/fixture
	LED outdoor pole/roadway LED canopy/soffit	> 200W; LED must be listed on qualified equipment list	\$400/fixture
		LED must be listed on qualified equipment list	\$125/fixture
	LED Flood Lights	≥ 100W: LED must be listed on qualified equipment list	\$100/fixture
	Custom LED	Listed LED equipment not indicated above; baseline determined by Rocky Mountain Power. LED must be listed on qualified equipment list.	\$0.08/kWh annual energy savings
	Exterior dimming control	Must control LED technology in an exterior lighting application. Control must be integral to LED fixture or fixture-mounted and reduce fixture power by 75% or more for a minimum of 6 hours per night or when the space has been unoccupied for 15 minutes or less.	\$0.34/watt controlled

**Notes for lighting incentives in new construction/major renovation projects:**

1. Qualified equipment lists referenced in the table are posted on the Wyoming energy efficiency program section at [Wattsmart.com](http://Wattsmart.com).
2. Energy savings are subject to Rocky Mountain Power approval. Certain lighting technologies/upgrades have been deemed ineligible for incentives. Qualified equipment lists referenced in the table are posted on the Wyoming energy efficiency program section at [Wattsmart.com](http://Wattsmart.com).
3. Watt controlled refers to the total wattage of lighting fixtures down circuit from the control.

IECC = International Energy Conservation Code  
LED = Light-Emitting Diode

\*Project cost caps of 70% and one-year simple payback apply to new construction and major renovation projects that are not covered by the International Energy Conservation Code (IECC). The one-year simple payback cap means incentives will not be available to reduce the simple payback of a project below one year. If required, individual measure incentives will be adjusted downward pro-rata so the project has a simple payback after incentives of one year.

\*\*Exterior lighting controls required by the applicable version of the state energy code are not eligible for incentives.
