

Solar Installer Checklist

1. Ensure that installer is able to conform to Rocky Mountain Power Policy 138, IEEE 1547 and UL 1741.
2. Ensure that customer of installer or installer has completed a Customer Generation Application/Agreement, which is available at [**rockymountainpower.net/customergeneration**](http://rockymountainpower.net/customergeneration).

If you have any questions, call us toll free at 1-888-221-7070.

3. Have the customer of installer or installer submit an application and application fee, if required for your state. Rocky Mountain Power will review it and let the installer and/or the customer know if there are issues needing further study. The review period typically takes 30 business days.
4. After submitting and receiving a Confirmation of Receipt from Rocky Mountain Power, the installer submits for and obtains the necessary permits from local city, county or municipal jurisdiction where the solar system will be installed.
5. The customer and/or installer will receive approval from Rocky Mountain Power via email.
6. Install the project and have it inspected by the local authorities (city or county electrical inspector or other authority for your area).
7. The installer or customer of the installer submits an approved electrical inspection form from the local authority to Rocky Mountain Power.
8. Rocky Mountain Power will install a net meter within 10 business days of receipt of the approved inspection.
9. Start generating electricity!
